THE KINDERGARTEN STARTERS - DUBAI
CIRCULAR
Sub: Teaching Tolerance and Generosity

27/02/2017

Dear Parent,

It gives me great pleasure to announce that The Kindergarten Starters will be introducing Tolerance and Generosity as part of our articulated curriculum.

An articulated curriculum refers to the logical progression of learning objectives from grade level to grade level and within the **curricular** content areas and explains the connectivity of learning that creates seamless learning throughout a student's educational experience.

This will be the first time a school is articulating Generosity and Tolerance on the curriculum in this region and perhaps in the world. The curriculum will include all of the learning experiences our children will have while at The Kindergarten Starters with special emphasis on making the class a tolerant and inclusive one as well as enabling students to embody the spirit of generosity.

We cannot succeed without your contribution and follow up at home for all of us have to work together to model the same for our children.

"The highest result of education is tolerance." wrote Helen Keller and we want to be the pioneers leading the way in embedding this in our children. Our efforts at philanthropy have received recognition from HH Sheikh Mohammed Bin Rashid Al Maktoum very recently and we seek to further what we have done because we cannot do enough of what is good and charitable.

Tolerance is a deep understanding of the universe and creation. It is the highest form of existence embracing all that we know and all that we don't with the same amount of love, respect and dignity. So if we must teach our children tolerance, we must live it.

I look forward to your support and cooperation to make our school's curriculum a truly unique one.

Warm regards,

Asha Alexander
Principal
