**THE KINDERGARTEN STARTERS
CIRCULAR
Adopting Dora**

03/05/2017

Dear Parent,

Marine turtles are important to us because they maintain the health of our beaches, corals and key habitats. Marine Turtle Research will help conservation work to understand the impact of human activities such as shoreline development, habitat loss and incidental capture in fishing nets. Because marine turtles travel across different habitats they help us to understand the health of our seas, which is important for the air we breathe, the food we eat as well as the economy and education.

The Kindergarten Starters is beginning a new venture to engage students on the important topic of marine conservation. We will be adopting Dora, the Green Turtle. In Arabic Dora means 'precious jewel'. We will be able to track Dora's movements across the seas and have access to interactive maps charting Dora's movements. This will be a part of our curriculum as students learn about the marine habitats. In order to do so we have to raise 10,000 AED by 23 May which is World Turtle Day.

Our Eco Team is conducting a drive to raise funds and we would request each student to donate just 2 AED to this cause. Should you wish to do so, please send the amount to the class teacher along with the acknowledgement slip in a sealed envelope, so that we reach our target to adopt Dora.

Thank you.
Regards,

**Asha Alexander
Principal**

Acknowledgement Form

I am enclosing AED 2/- towards Adopting Dora, with my ward _____
of KG/ Grade: _____ Section: _____
Parent Name _____ Parent Mobile No: _____ Signature _____
