

THE KINDERGARTEN STARTERS – DUBAI
CIRCULAR

KGS/C/916-18

15/01/2018

It's kind of fun to do the impossible - Walt Disney

Dear Parents,

In order to measure the impact of the STEAM curriculum we have in our primary, The Kindergarten Starters offers your children a unique opportunity to enter into a project- based competition organized by Destination Imagination.

DI develops project-based learning programs that blend STEM (science, technology, engineering, and mathematics) education with ARTS making it STEAM. This activity promotes STEAM based curriculum that the Kindergarten Starters follows.

More than 18000 participants at the DI Global Finals 2017

[CLICK HERE](#) to watch a short video about the POWER of the Destination Imagination Team Challenge Experience to increase student ability to think, work collaboratively and solve audacious challenges that are dynamic, engaging and FUN!

With 6 brand new STEAM-based challenges (Scientific, Fine Arts, Technical, Engineering, Community Service & Improvisational) for ALL students, there is a challenge for EVERYONE! Please go through the [First Look](#) document to have a better understanding of the challenges and choose yours.

Students will participate in teams, each team will have a mentor (a teacher volunteer, who will be trained by DI). Once you register and pay the fee, you will have access to the entire curriculum, rules of the road, road map, online support and entry to the UAE Tournament.

Each Destination Imagination Team Challenge is an open-ended project that teams work on over an extended period of time, usually 2-4 months (January until March) **in school** and then participate in the **UAE tournament** where all **Teams from across the UAE** will present their challenge in front of international judges and appraisers.

The winners of the UAE tournament will travel to USA in May to represent the country and the school at the Global Finals of Destination Imagination.

It's highly recommended that you give your child this unique opportunity to take part in this competition.

This competition is for the students of **Grades 2 to 5**. The registration fee per participant is **AED 500/-**. If you are interested to enroll your child in this competition, please fill in details on the given link and send in the money to the class teacher in a sealed envelope, on or before **18th January, 2018**.

Kindly update the below link to confirm the participation:
